Baker Center

Drawing from the Past: **Designing for the Future.**

RSP specializes in seamless design that blends the soul of a space into the rhythm of the city. We offer problem-solving solutions that extend beyond the tangible bones of a building. We understand the high demands placed on buildings; they must provide more than a place to work. Investing in top-tier amenities, vibrant details, and connected spaces is crucial. But so is preserving the origin story of a space. Revitalizing and repositioning existing spaces offers the chance to uncover history, personalize the story, and deliver it to a new audience. In honoring the past, we are securing a bright, innovative future for the city, these historic buildings and their occupants for years to come.
