# Wellness Suite

Design to Perform. Crafted to Restore.

*Bio Silica Hybrid Coated Textiles · Crypton® Performance Wovens · Privacy Curtains*

Human-centered spaces are shaped through material, intention, and care. Wellness Suite was designed with that belief—that healing environments should be as beautiful as they are resilient, and that the sense of calm and restoration a space provides is as important as the care delivered within it.

At the intersection of healthcare, hospitality, and med-spa design, these materials come together through tactile layering, soft dimension, and a curated palette—shaping spaces that feel restorative, supportive, and deeply connected.

The **Wellness Suite** Collection

## Bio Silica Hybrid + Crypton® Performance Wovens

Performance textiles designed to balance durability, comfort, and thoughtful design, combining two distinct approaches to high-use upholstery. Across the collection, nature serves as a quiet constant—informing texture, pattern, and materiality.

Bio Silica Hybrid delivers advanced cleanability through a bio-based, coated construction with a soft, supple hand, while Crypton® performance wovens feature an integrated moisture barrier and stain resistance that ensure lasting protection. Together, they bring warmth, resilience, and tactile dimension to healthcare interiors—supporting a more human-centered, hospitality-inspired experience where performance is essential.

### Coated **Bio Silica Hybrid** Textiles

- Bio-based coated textile that reduces reliance on fossil fuels
- Silicone-infused surface for durability + cleanability
- 76% bio-sourced polyurethane + 24% silicone
- 100% recycled (PCR) polyester backing
- PVC-free, PFAS-free, FR-free
- GREENGUARD Gold certified
- HPD
- 500,000+ double rubs
- Bleach cleanable (10:1)
- Inherently stain, ink, and microbial resistant
- Soft, supple hand with exceptional durability

### Crypton® **Performance** Wovens

- Integrated moisture barrier prevents liquid penetration
- Stain resistance
- Soft, woven hand with dimensional texture
- Recycled fiber content
- GREENGUARD certified
- High durability (100,000+ double rubs)
- Bleach cleanable options available
- NSF/ANSI 336

### **Shared** Performance

- Designed for demanding, high-use healthcare environments
- Engineered for durability across coated and woven constructions (100,000–500,000+ double rubs)
- Balances cleanability with a softer, more comfortable hand

## Grass Line

### *Coated Textile - Bio Silica Hybrid*

A study in subtle texture, this textile draws from the irregular beauty of natural fibers and hand-finished surfaces. Fine, layered striations create a soft organic rhythm that feels quiet and grounded.

Offered in fifteen colorways, multicolor variation introduces depth and movement, allowing the surface to shift gently across the upholstery. Understated yet dimensional, Grass Line brings a natural ease to spaces designed for comfort and care.

## Alcove

### *Coated Textile - Bio Silica Hybrid*

Alcove translates layered natural forms into a dimensional all-over texture inspired by intersecting branches, shifting light, and organic movement—creating a subtle biophilic effect.

A softly structured surface echoes chunky bouclé, adding depth and visual tactility. Backed by Bio-Hybrid Silica's coated construction, it balances a woven aesthetic with healthcare-grade performance, available in nine colorways.

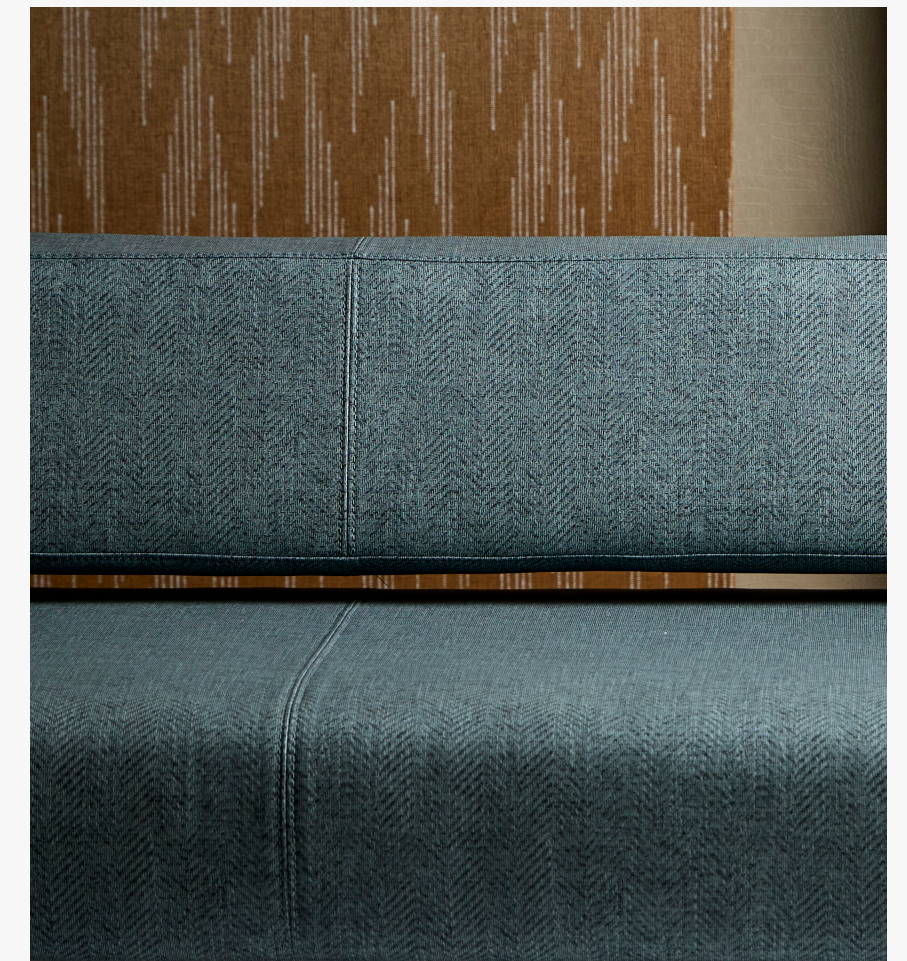

## Herring

### *Coated Textile - Bio Silica Hybrid*

A refined take on a classic, this textile translates the enduring herringbone into a printed texture that captures the depth and nuance of a woven construction.

Subtle movement softens the structure, introducing a quiet sense of tactility and ease. Familiar yet elevated, it provides a versatile, tailored foundation for high-performance environments, presented in fifteen colorways.

## Heddle

*Woven Textile - Crypton®*

A versatile texture with quiet sophistication, Heddle reveals subtle striations through a softly blended, space-dyed effect. Layered color fill yarns create nuanced variation, bringing depth, movement, and a crafted sensibility with a soft, approachable hand.

Named for the loom's heddle, the pattern reflects a slower, more intentional rhythm of making—where each thread is placed with care. Constructed with Crypton® performance and a moisture barrier, Heddle balances durability with comfort in fifteen colorways.

## Grounded

### *Woven Textile - Crypton®*

A midscale woven texture combining bouclé, slub, and chenille yarns into a softly distressed, dimensional pattern. The layered construction brings depth and movement without overpowering, allowing it to pair effortlessly with both solids and patterns.

Constructed with Crypton® performance and a moisture barrier, Grounded is designed for durability in high-use settings. Incorporating SEAQUAL® yarn made from recycled marine plastic, the textile brings a more responsible material story to an elevated upholstery in nine colorways.

## Clear View

### *Privacy Curtain*

A full-scale ombré pattern, Clear View brings a sense of calm and openness to patient spaces, with gradual tonal transitions inspired by the natural horizon.

Balancing performance with comfort, the design enhances privacy while softening visual boundaries. Made with recycled content and FR-rated for healthcare environments, it supports a more restorative, human-centered approach to patient care. Available in six coastal-inspired colorways—soft neutrals, light blues, and a fresh meadow green.

- Full-scale ombré gradient inspired by natural horizons
- Enhances privacy while softening boundaries
- Hospitality-inspired softness and flow
- FR-rated for healthcare environments
- Railroaded for efficient fabrication

*“Healthcare spaces are being asked a new question. Not just: does it perform? But: does it restore?”*
