DELAYED-RELEASE CAPSULES

Dear {{customText[ | Dr | Mr | Ms | Mrs ]}} {{customText[ ##accLname## | ##accFname## | ##accFname## ##accLname## ]}},

Thank you for taking the time to participate in the recent ZENPEP speaker program. Your engagement and commitment help ensure patients with EPI get the treatment they need.

As highlighted throughout the program, ZENPEP delivers MORE of what your patients need from PERT.

## ZENPEP delivers MORE

### More coverage

**94%**

Coverage for patients with **commercial insurance and Medicare Part D**<sup>1\*</sup>

### More lipase per capsule

Only ZENPEP lets you start most adults on a **single high-strength capsule (40K or 60K)**<sup>2</sup>

### More support

**\$0**

**Copays available** for eligible commercially insured patients, with savings on every prescription and refill<sup>3</sup>

We're interested in your feedback

# ZENPEP® COVERAGE, SAVINGS, AND SUPPORT

pancrelipase  
**Zenpep**®  
DELAYED-RELEASE CAPSULES

Dear {{customText[ | Dr | Mr | Ms | Mrs ]}} {{customText[ ##accLname## | ##accFname## | ##accFname## ##accLname## ]}},

Thanks again for your dedication to EPI management and interest in ZENPEP. As discussed during the recent speaker program, coverage can be one of the biggest barriers for patients with EPI. ZENPEP is available to your patients who need it—across plans, channels, and coverage types.

## ZENPEP is the most broadly covered PERT<sup>1</sup>

**94%**

ZENPEP is covered for 94% of patients with commercial insurance or Medicare Part D<sup>1\*</sup>

And 85% of those patients have no prior authorization or step edit requirements<sup>2</sup>

**302 M**

ZENPEP is covered for over 302 million individuals with commercial and Medicare channels/insurance—10 million more lives covered than Creon<sup>®</sup> (pancrelipase)<sup>1††</sup>

## ZENPEP gives your patients more savings and support with Z-Save<sup>®</sup>

The Z-Save Program is designed to help eligible commercially insured patients, including those with high copays<sup>§</sup>

Z-SAVE® PROGRAM

Powered by **mercalis**

ELIGIBLE PATIENTS  
**PAY AS LITTLE AS \$0\***  
for each ZENPEP® prescription and refill

For **30-day** or **90-day** prescriptions

\*Max bonus savings limit applies; patient out-of-pocket expense may vary. Offer not valid for patients enrolled in Medicare, Medicaid, Medicaid, TRICARE, or other federal or state healthcare programs. This offer is not valid for cash-paying patients. Please see back of card for Program Terms, Conditions, and Eligibility Criteria.

# ZENPEP® DELIVERS MORE OF WHAT YOUR PATIENTS NEED

pancrelipase  
**Zenpep**®  
DELAYED-RELEASE CAPSULES

Dear {{customText[ | Dr | Mr | Ms | Mrs ]}} {{customText[ ##accLname## | ##accFname## | ##accFname## ##accLname## ]}},

Thank you again for joining the recent discussion on ZENPEP. As highlighted during the program, ZENPEP helps you offer MORE of what your patients need. With flexible dosing options and high-strength capsules, you can customize EPI treatment from the start.<sup>1</sup>

## Quick Poll

### What is the appropriate starting dose for a patient with moderate symptoms who weighs 190 lb?

Your clinical perspective can add valuable insight to the discussion.

25K LIPASE UNITS

40K LIPASE UNITS

60K LIPASE UNITS

### Only ZENPEP lets you start most adults on a single high-strength capsule<sup>1,2</sup>

Consider the “180-lb rule” as an easy-to-follow dosing guide

For patients  
115 lb to 179 lb

OR

For patients  
180 lb to 265 lb

- This illustration is intended to be an example; ZENPEP capsules represent nearest capsule count within recommended dosing range
- The dose of ZENPEP should be individualized based on weight, severity of clinical symptoms, the degree of steatorrhea present, and the fat contents of the patient's diet
- For patients on the lower end of the weight range, a lower dose may be appropriate
- Do not exceed 2,500 lipase units/kg/meal, 10,000 lipase units/kg/day, or 4,000 lipase units/g fat ingested/day in adult and pediatric patients greater than 12 months of age without further investigation
- ZENPEP 40K and/or 60K may not be appropriate for all patients. ZENPEP is available in 3K, 5K, 10K, 15K, 20K, 25K, 40K, and 60K USP units of lipase
- Therapy should be initiated at the lowest recommended dose and gradually increased
- ZENPEP capsules and capsule contents should not be crushed or chewed. ZENPEP should be taken with every meal and snack. Usually, half the prescribed dose for an individualized full meal should be given with each snack

For severe EPI symptoms with steatorrhea, write 2 capsules PO with each meal. Dispense 300. Capsules not actual size. EPI=exocrine pancreatic insufficiency; PERT=pancreatic enzyme replacement therapy; PO=by mouth.

## Only ZENPEP offers 8 different strengths<sup>1</sup>

### Flexible dosing for your patients with cystic fibrosis

Capsules not actual size.

Did you know ZENPEP is also the most broadly covered PERT available?<sup>23</sup> Find out
